EXECUTIVE SUMMARY

Business Operations & Business Intelligence Analyst with **over 9 years of experience** driving operational excellence through data analytics, business process optimization, revenue cycle optimization and business intelligence solutions. Experienced in SQL, Power BI (DAX), Advanced Excel, HIPAA-compliant data workflows to improve clinical efficiency and KPI reporting to improve operational efficiency, automate executive reporting, and support strategic decision-making. Proven success leading cross-functional teams, streamlining workflows, and delivering measurable improvements in SLA performance, reporting accuracy, customer experience, and operational productivity. Demonstrated expertise in quantitative analysis through the design and development of a custom Trading View analytics platform using Pine Script v5, applying statistical analysis, pattern recognition, and historical back testing to transform complex financial data into actionable decision-support insights.

TECHNICAL SKILLS & COMPETENCIES

Data & Analytics:	SQL, Power BI (DAX), Advanced Excel, Power Query, Data Modelling, Dashboard Development, Data Visualization, MIS/KPI Reporting, Time-Series Analysis.
Business Strategy:	Business Process Mapping, Revenue Cycle Management (RCM), HIPAA Compliance, Patient Health Information (PHI) Security, Requirements Gathering, Gap Analysis, Root Cause Analysis (RCA), SOP Development, Lean Six Sigma Methodology.
Systems & Tools:	SQL Server, Salesforce CRM, Jira, Trading View (Pine Script v5), E-Clinical Works (eCW), Curogram, Microsoft Office Suite, Prompt Engineering

PROFESSIONAL EXPERIENCE

Operations & Business Intelligence Analyst Arthritis Clinic of Cypress & Katy (USA Remote)	May 2021 – Present Remote
---	--

Led operational excellence, HIPAA-compliant data analytics, and healthcare workflows, directly managing a cross-functional team of 30 clinical and operations professionals.

- **SLA Transformation:** Spearheaded data-driven operational overhauls using Root Cause Analysis (RCA), successfully **recovering SLA compliance from 68% to over 90%** while slashing Tier-1 escalations by 43%
- **Business Intelligence & Automation:** Built end-to-end Power BI dashboards and automated executive reporting pipelines, reducing manual data compilation effort by 50% and **saving 20+ resource hours per week.**
- **Operational Velocity:** Executed optimized SQL queries on cross-functional operational datasets to eliminate clinic workflow bottlenecks, **driving a 25% reduction in turnaround time and a 22% surge in workforce productivity.**
- **Revenue Cycle Optimization:** Partnered with billing and clinical leadership to optimize RCM workflows, reducing billing turnaround times, improving clean claim rates, and elevating overall reporting accuracy.

Technical Subject Matter Expert
Yahoo Small Business

Sep 2018 – April 2021
Indore, India

Owned performance analytics, operational trend reporting, and workload forecasting for customer operations.

- **Incident Reduction:** Conducted deep-dive analysis on historical support data using Advanced Excel, introducing strategic process improvements that **decreased recurring technical incidents by 25%**.
- **Workforce Efficiency:** Engineered data-backed workload forecasting models to optimize staff scheduling, improving overall workforce allocation efficiency by 15%.
- **Quality Engineering:** Developed comprehensive Standard Operating Procedures (SOPs) based on customer friction points, successfully dropping repeat customer contacts by 20%.

Customer Operations Executive
Flipkart

July 2017 – Aug 2018
Indore, India

Managed high-volume logistics and transaction verification analytics for India's leading e-commerce platform.

- **Escalation Mitigation:** Monitored delivery performance datasets to run root-cause analysis on transit delays, **reducing delivery-related escalations by 20%**.
- **Risk & Accuracy:** Supervised complex payment validation and transaction verification workflows, consistently maintaining a **95%+ operational accuracy rate**.

SELECTED STRATEGIC BI PROJECTS

Healthcare Revenue Cycle & Claim Denial Analyzer

SQL, Power BI, Advanced Excel

- **Objective:** Developed an automated data pipeline to analyse medical claim submission datasets, identify root causes for claim denials, and track outstanding Accounts Receivable (A/R) days.
- **Impact:** Isolated high-risk billing and pre-authorization coding bottlenecks, driving recommendations that improved clean claim velocity and provided real-time visibility into executive RCM KPIs.

FinTech KYC Friction & Conversion Optimization Model

SQL, Advanced Excel, Power BI (DAX)

- **Objective:** Developed an end-to-end data pipeline and interactive business intelligence dashboard to identify user drop-offs and operational leaks during the onboarding and customer verification lifecycle.
- **Execution:** Wrote optimized SQL queries to extract raw sign-up transaction logs, structured the backend data models in Advanced Excel, and engineered a dynamic funnel tracking schema in Power BI.
- **Impact:** Isolated a major **58% third-party API verification lag time bottleneck**, quantifying a baseline **₹29L marketing spend leakage** and delivering data-driven infrastructure backup recommendations to cross-functional leadership.

Operational Reporting Automation (MIS)

Power BI, Advanced Excel

- Engineered a centralized tracking infrastructure utilizing Power BI and Advanced Excel to automate data ingestion from multiple disparate streams.
- **Impact:** Cut manual reporting cycles by **50% (reclaiming 20+ hours per week)** and provided senior stakeholders with real-time, interactive KPI visibility to mitigate downstream financial risk.

SLA Recovery & Process Stabilization

Root Cause Analysis (RCA)

- Spearheaded a cross-functional operational turnaround framework using Root Cause Analysis (RCA) to systematically diagnose structural failure points in the service delivery lifecycle.
- **Impact:** Restored on-time service resolutions from **68% to a sustained 90%+ within 6 months** while reducing tier-1 customer escalations by 43%.

Quantitative Trading Analytics Platform Architecture

Trading View, Pine Script v5

- Architected a proprietary, rule-based quantitative model combining EMA, RSI, and Volume Analysis to parse time-series financial data and synthesize systemic market signals.
- **Performance Metrics:** Rigorously back tested the framework across **200+ historical trades, validating a 72% signal accuracy rate** mapped to strict 1:2 risk-to-reward parameters.

EDUCATION & CREDENTIALS

Bachelor of Commerce (Computer Applications)

Graduated: 2020

Devi Ahilya Vishwavidyalaya
